

Breezair 120

Evaporative Cooler
8,210m³/hr

Features

This single fan warehouse evaporative cooler with large volume air movement of 8,210m³/hr is ideally suited to warehouse areas and workplaces.

The Cool Energy Breezair 120 unit has been designed for a fast rental installation and start up.

The unit operates from a standard 13amp single-phase supply and has no heat rejection hose.

In addition to this, the unit is entirely portable and has castors. This allows for easy movement when cleaning around this lightweight unit and also has a robust stand to offer protection.

Benefits

The 120m² evaporative cooler is a freestanding unit and can direct cool air in localised areas with the assistance of an adjustable fan speed controller.

The unit operates by a totally natural process of evaporation without the use of refrigerants. The air is cooled by passing over a large wet filter pad with the production of no harmful products – just cool fresh air.

Installation takes minutes and the unit cools an area up to 120m². The unit holds a maximum of 100litres, which requires topping up as and when required.

Max air flow	m ³ /hr	8210
Power supply		230/1/5 (1.5mm ²)
Power sound level	dBA	90 @ 10m
Measures (H x W x D)	mm	920 x 980 x 1,310
Weight	Kg	100
Air connections	-	none
Current consumption	Amps	4.0
Max power absorbed	kW	1.0
Power connections	-	13 amp standard plug
Water reservoir	Litres	100
